Program 3 – Grading Sheet

Name: _Ben Newberd_   Section _A_   Date turned in: _10.27_   Late? _No_

Parts of the program I didn't get to work:

    I got every part of the program to work.

Comments on this assignment:

3 random things:
1. Location of dots used to draw fern
2. Background color of canvas
3. Brown/orange spots on plant

3 primitives:
1. Ellipse – dots for fern + sun
2. Rectangle – brown base
3. Line – sun rays

_____For Grader's Use_____

- Program compiles and runs (30)   _____

- Program displays a fractal, with self-similarity at different levels (20)   _____

- Program has sliders that control three parameters of the rendering (10)   _____

- Program uses three types of randomness and three primitives (10)   _____

- Program displays a realistic-looking fern (10)   _____

- Program uses good programming style (10)   _____

- Mechanics: turn in printout with grading sheet; submit electronically (10)   _____

                                                 Total (100)   _____
